

Personal reflection week 3

Simon Johnsson

April 2022

1 What do I want to learn or understand better?

A:

I want to understand the React library for JavaScript better so that I can feel more secure in my contributions.

B:

I should be comfortable enough such that it allows me to work independently.

A \rightarrow B:

By practicing and asking when things feel uncertain.

2 How can I help someone else, or the entire team, to learn something new?

A:

Currently I provide the possibility to answer questions and help when others feel uncertain.

B:

People should feel comfortable in exploring things they do not know.

A \rightarrow B:

By normalizing the idea of rotating workload such that everyone gets to work on new (unfamiliar) things.

3 What is my contribution towards the team's use of Scrum?

A:

I am the scrum master and makes sure that the scrum process is followed.

B:

I should use it and understand it myself as well as encourage others to do the same.

A → B:

By reflecting upon the usage of scrum and reviewing both troublesome and successful areas.

4 What is my contribution towards the team's deliveries?

A:

I assign myself to user stories which I feel are possible to complete during the sprint.

B:

Everything I work on should provide value to somebody and the workload should be equal to the rest of the team.

A \rightarrow B:

By learning to give a fair time assessment and knowing my own work limits.
