Personal reflection week: 2

Simon Johnsson

April 2022

1 What do I want to learn or understand better?

A:

Currently I would like to hone my ability in using our determined developing tools, including tools such as JavaScript, React and GitHub.

B:

The aim is having a sufficient knowledge of the tools' usage to such an extent that they do not provide any hindrance to realizing my goals.

A → B:

Practicing using and reading the documentation about the given tools is the most efficient way to ensure that the wished level of competence is achieved.

2 How can I help someone else, or the entire team, to learn something new?

A:

I provide the opportunity to grant assistance in areas I feel more proficient and well versed in.

B:

My goal is to create an environment where everyone feels comfortable in requesting assistance when they feel that I could provide beneficial insight and/or instructions.

A → B:

Support and promote going into situations where learning is necessary.

3 What is my contribution towards the team's use of Scrum?

A:

Currently I have assumed the role of Scrum Master and is therefore responsible for maintaining the usage of Scrum.

B:

The goal is making Scrum a natural part of the project's process and my contribution should therefore not stand out or feel extraordinary.

A → B:

Promote equal usage between everyone in the team to such an extent that it feels natural to use.

4 What is my contribution towards the team's deliveries?

A:

Currently the sprint hasn't started yet which as a consequence means that my contribution is solely in preparation.

B:

The goal is to contribute equally to the other team members such that the workflow is distributed uniformly.

A → B:

Undertake tasks which provide value to the sprints' goals.
